## Assessment rationale: Why has this assessment been used for this module?

This module will include two forms of assessment. These will be able to assess and develop student's ability to work within a group and individually.

### Assessment 1 - **Case Study** (up to 1500 words)

This will be an individual assessment via a Case Study (up to 1500 words) that will assess student understanding of consumer behaviour theories and concepts of consumer behaviour, product use (goods and services) and consumption to real-life examples as well as the impact and importance of culture, values, beliefs, conventions and other internal and external influences on customers and consumers' decisions. This assesses LO1 and LO2.

The assessment for this module has been designed in the full expectation that formative assessment is completed, as directed, by the module leader; failure to do so is likely to impact on the student's ability to pass the module.

### Assessment 2 - **Group Presentation** (up to 20 minutes)

This will be a group presentation that assesses student's ability to apply consumer behaviour theories to a given business context. The in-class presentation will be in total 20 minutes long, allowing each student up to 5 minutes. Learning from this assessment will allow students to develop a deeper understanding of the importance of culture, values, beliefs, conventions and other internal and external factors in customers' and consumers' decisions. This assesses LO3 and LO4.

## **Assessment criteria: What criteria will be used to assess my work on this module?**

University Grade Descriptors are a benchmark point of reference, they are contextualised using specific subject specialist criteria specific to a particular assessment.

[University Grade Descriptors](#)

### **Assessment 1 - Case Study:**

Marks will be awarded individually based on the following assessment criteria.

- Student's ability to analyse and apply consumer behaviour and organisational buying behaviour theory to marketing action in different contexts and usage situations
- Student's ability to practice active learning, problem solving, and autonomy
- Student's ability to apply the marketing knowledge and transferable skills required for professional marketers.

### **Assessment 2 - Group Presentation:**

Marks will be awarded individually based on the extent to which students:

- Understand and apply consumer behaviour theory, including definitions,
- use of research,
- demonstrate communication skills and teamwork.

All assessments reference the [University Grade Descriptors](#).
